

# ***BLUENERGY STADIUM HIGHLIGHTS***

The second club-owned Italian stadium and the first stadium in Italy to be sponsored by a commercial brand, Bluenergy Stadium is a multi-functional facility with a capacity of 25,132. The stadium was designed for the pleasure and safety of its guests.

Its design allows guests to experience a wonderful atmosphere during events and ensures a fantastic view of the pitch from every seat.

A spectacular diamond facade covers three quarters of the stadium, giving the building both an elegant and modern look.

All stands feature multicoloured seats, which are another distinctive characteristic of the stadium and make it immediately recognisable.

Two big screens measuring 60 m<sup>2</sup> display information for guests.

The inside of the stadium is equipped with TV monitors for entertainment during match breaks.

Designed with families in mind, Bluenergy Stadium has dedicated children's areas and baby change facilities.

A total of 15 bars and eateries are located in the stands.

### **A SUSTAINABLE FACILITY**

Built with sustainability as a priority, Bluenergy Stadium was constructed on the site of the old stadium to avoid using more land. The club also ensured that material from the demolition of the old stadium was reused in the new project. The stadium aims to be a reference point for the local area and open seven days a week. It is also home to Udinese Calcio and its training centre.

### **VIP HOSPITALITY AND MEETING CENTRE**

In the centre of the west stand, the club's corporate hospitality, Udinese Club House, offers luxury hospitality with five different packages to choose from. Award-winning chefs, pre-match meet and greets, and social events all make matchdays that bit more special for the 250 partners companies' guests.

A meeting centre equipped with the most modern multimedia technology is also available to partners and businesses all year round. The meeting center host around 100 events a year.

### **GETTING HERE**

The stadium has parking and is located close to ring roads and motorway exits for a quick and easy arrival.

Local road and rail public transport link the city with other towns in the region and nearby airports.

### **NEW SPACES**

Work is soon to begin on new spaces that will be open to the public. These spaces include a wellbeing centre, a medical centre, leisure and family areas.
